

PLANTHERA

Your Path to Natural Wellness

Collagen Tripeptide

CTP is the smallest functional structure in collagen and the most effective skin elasticity peptide. It can be directly absorbed through the skin, reaching the deeper layers of the skin and stimulating the production of subcutaneous collagen.

Recommended Use

- ✓ **Direct Use:** Dissolve a small amount of powder with water or a balancing solution, and apply directly to the skin. Gently massage into fine lines to aid better absorption.
- ✓ **Mixed Use:** Added to serums and skincare products (not suitable for products containing essential oils). Use as a base before applying a face mask for excellent results.
- ✓ **Adequate sleep and proper supplementation with Vitamin C** can also enhance collagen absorption.

Benefits

- ✓ **Firms and lifts cheeks.**
- ✓ **Absorbed in 3 seconds, boosts metabolism.**
- ✓ **Brightens skin and whitens, soothes and repairs.**
- ✓ **Long-lasting hydration, reduces wrinkles.**
- ✓ **Slows down skin aging, restores elastic and bouncy skin.**
- ✓ **Skin becomes white, bright, translucent, hydrated, and vibrant.**
